

# INSTALLATION INSTRUCTIONS

**Please read these instructions carefully before attempting to install this product.** It is advisable to keep these instructions in a safe place for future reference. **IF IN DOUBT, CONSULT A QUALIFIED ELECTRICIAN.**

## PARAMETER:

IP Rating	IP44
Rated Voltage	AC 220-240V, 50Hz
Rated Wattage	Max.60W or Max.23W CFL
Protection Class	Class I
Source of light:	E27

## Electrical Installation

Always switch off the electricity supply at the mains during installation and maintenance. We recommend that the fuse is withdrawn or circuit breaker switched off at the distribution board whilst work is in progress (turning off the light switch is not sufficient).

1. Using a suitable tool (drill or screwdriver), knock out the fixing holes in the mounting plate. Using the mounting plate as a template (and noting UP marking), mark the positions of the fixing holes on the mounting surface.
2. Drill out the fixing holes, taking care not to foul any pipes or mains cables behind the mounting surface, and insert the wall plugs.
3. Pierce the grommet, and feed the incoming mains cable through the grommet into the mounting plate. Ensure the bolts are in position, then secure the mounting plate to the wall using the fixing screws.
4. Connect the mains supply to the terminal block, using the following colour code for the wiring:  
Connect the Brown (Live) wire to the corresponding terminal on the terminal block marked L.  
Connect the Green/Yellow (Earth) from the mains supply to the Earth terminal marked E or .  
Connect the Blue (Neutral) wire to the corresponding terminal on the terminal block marked N.
5. Offer up the main lamp body to the mounting plate, and secure it to the mounting plate using the thumb nuts.
6. Fit the recommended lamp type: 60W ES GLS or 23W CFL, E27. Replacement lamp should be of the same type, voltage and wattage.  
\* Always switch off the electricity supply and allow to cool for 10 minutes before changing the lamp.
7. Refit the shade by carefully screwing back into place. Tighten by hand.
8. Restore mains supply and switch on.

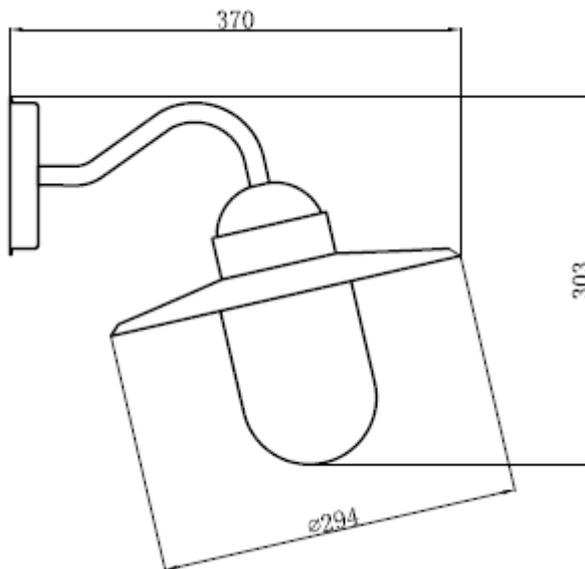

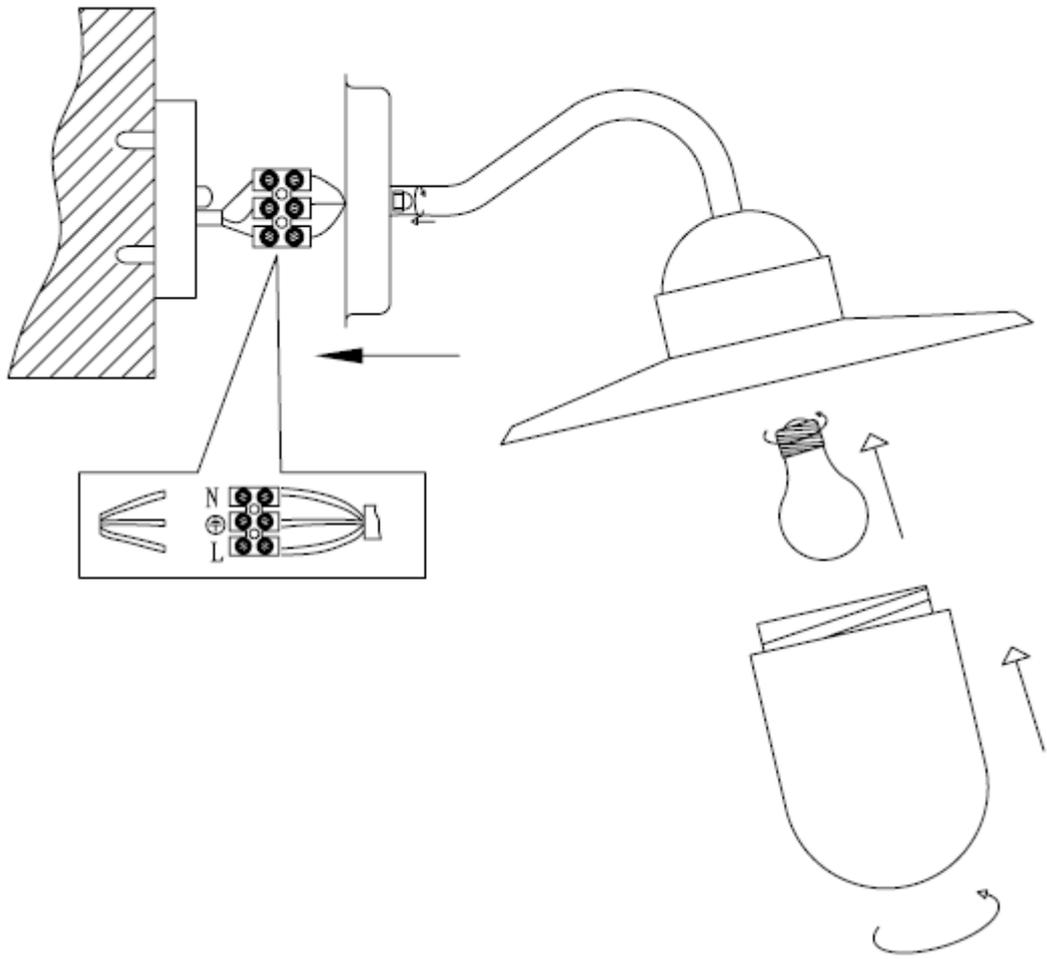

## Care and Use

1. This product must be earthed.
2. We suggest that you use H05RN-F specification cable (not supplied) which is an outdoor grade, rubber sheathed cable. The cable must have a minimum cross sectional area of 1.0mm<sup>2</sup>.
3. Please use the double-pole-off switch.
4. Replace any cracked/damaged diffuser immediately-do not use if they are damaged.
